

CORROSION CONTROL FOR FISHING EQUIPMENT

Aussie Owned
Aussie Made

"You won't believe it! I know I didn't. My old reel had years of salt build up and corrosion and is now spotless after one overnight soak in the SX50 solution. It's the best thing I've seen to stop salt corrosion."

"The photo's below say it all".

CORROSION CONTROL FOR MARINE ENGINES

Aussie Owned
Aussie Made

"With over 8000 hours on the clock and no obvious cause for the overheating, I was beginning to think a replacement engine was on the cards. SX50 has removed the cause of the engine's overheating. Out of this whole experience, I'll now be using SX50 as a regular maintenance agent. SX50 has provided a very effective solution to resolve what could have turned into a major engine problem to fix".

Bruce Jenkins, Yachty, Gosford
